

DR Congo Aerodromes and Helipads Directory

AVIATION AIR TERMINAL UNIT

MONUSCO

2nd Edition, February 2015

INTENTIONALLY LEFT BLANK

Sources

Landing sites information included in this document have been gathered from the following sources:

- DR Congo Aeronautical Information Publication (AIP);
- MONUSCO reconnaissance mission reports;
- Airlines crews and other aviation infrastructure users;
- Different aeronautical publications (Jeppesen manuals, aeronautical charts, etc.).

Some of the landing sites regularly receive aircraft performing commercial and/or chartered flights, whereas other sites are occasionally used for special tasks (e.g. UN/NGOs missions, monitoring ...), or have been inspected or maintained quite long ago. For these reasons, latter sites may not always be serviceable. Therefore, it is advisable to ascertain the current status of any site before considering its possible use.

Abbreviations

ALS: Landing strip (Airstrip); *here* indicates any unpaved landing strip which can be used for light fixed wing aircraft operations, and where no assistance is provided to the users.

APT: Airport; *here* indicates any aerodrome where a minimum of aviation services are rendered to the users.

ft: feet/foot (1 ft = 0.3048 m)

HLS: Helicopter Landing Site; *here* indicates any site which can be used for helicopter operations.

IATA: three-letter codes defined by IATA for identifying airports and cities around the world
(IATA - International Air Transport Association).

ICAO: four-character alphanumeric codes defined by ICAO for identifying each airport around the world
(ICAO - International Civil Aviation Organization).

m: meters (1 m = 3.2808 ft)

RWY: Runway; *here* indicates any paved landing strip which can be used for fixed wing aircraft operations.

T: ton(s)

Disclaimer

Nothing in this booklet should be taken to constitute professional information or a formal recommendation, and we hereby exclude any liability whatsoever relating to the use of this document content, which actually should be considered as informal information only.

For any official information, please refer to the Aeronautical Information Publication (AIP) of the Democratic Republic of Congo or any other official document.
