

3.2 Iraq Transporters

Transport companies are largely available with a wide range of truck typology and loading capacity-- from 2 mt to 40 mt. Maximum limit capacity to be transported in truck is between 25 mt and 30 mt of cargo either in the KR-I or in the rest of Iraq.

In 2018, Iraq Ministry of Planning stated that 736 General Company for Land Transport are operating throughout Iraq. Many are small companies with a limited fleet, and expand their capacity when needed. Many of those originate from Turkey.

The country has a large road transport trade through the main roads. The quality of the roads is predominantly good, and the price of fuel is generally stable and cheap.

Constraints are represented by security situation that might involve restricted movement for trucks matriculated in governorates under different control. This fact might require shifting cargo to locally matriculated trucks.

For further contact information, please see the following link: [4.8 Iraq Transporter Contact List](#)

Transportation of NFI and Food with truck from 8 to 30 MT capacity:

*The price indicated is an **average price** in dollar per mt (price can vary by 30-50% below and above the prices provided in the below table). Price can vary depending of the amount of service purchased to the supplier.*

From	To Governorate	To District	FOP / Sub-District	Offer (USD/mt)
