1 Philippines Country Profile

Generic Information

The Philippines, officially the Republic of the Philippines (Filipino: Republika ng Pilipinas), is an archipelagic country in Southeast Asia. Situated in the western Pacific Ocean, it consists of about 7,641 islands that are broadly categorised under three main geographical divisions from north to south: Luzon, Visayas and Mindanao.

The Philippines’ location on the Pacific Ring of Fire and close to the equator makes the Philippines prone to earthquakes and typhoons, but also endows it with abundant natural resources and some of the world’s greatest biodiversity.
