

3.2 Marshall Islands (RMI) Transporters

There are no dedicated road transport companies in RMI. Majuro is the only Atoll with a significant length of road being 50Km. The main interisland transport is by sea.

On Majuro atoll there are several retail outlets and general freight/construction companies who operate their own vehicles which may be available on an adhoc basis. Generally these consist of 1 MT pickups and 2 MT 2wd trucks being the most common. 15Mt flatbed truck exist though these are rare.

The RMI Govt Public works department also has some vehicles mainly for carting heavy equipment and materials.

The Majuro Stevedore and Transport Company (MSTCO) operates 60 Container chassis trailers for the delivery of containers to customers from Delap dock. They operate 2 prime movers to move and drop the containers with the trailers to customers where they stay for up to 10 days while the container is unloaded. The container with the trailer is then picked up and returned to Delap Dock. They also operate 2 side lift trailers for the dropping and picking up of containers.

For more information on transport company contact details, please see the following link: [4.8 Transporter Contact List here.](#)
