Mozambique Milling Assessment

Milling Overview

Milling companies in Moçambique can be classified into 2 categories:

1. Medium to large scale organisations who mill mostly wheat and maize
2. Small-scale organisations who mostly mill maize and cassava (less than 5 mt/day)

Medium to large-scale Millers

There are about eight medium to large millers in Moçambique who have milling capacities ranging from 50 mt/day to 380 mt/day in a variety of bag sizes from 1 kg to 50 kg.

Small-scale Millers

Small-scale millers process less than 5 mt of grain per day, but many typically mill less than 1 mt. A typical mill might have 1 – 3 hammer mills and they mill locally produced cereals for local consumption. The customers either grow their own cereals or purchase un-milled supplies in the market and bring for milling, for which the owner charges. Batches of 3 – 15 kg of grain may be milled at a time, feeding a household for up to 2 weeks. This flour is not normally packaged and none of the millers know about, or had the equipment, for fortification. The operational aspects of these mills varied from very good to very poor

Milling Company Companhia Industrial da Matola – CIM

Company Name & Address	Contact Names & Email	Telephone & Fax
Companhia Industrial da Matola – CIM Rua da Namaacha, Estrada Velha Nº 186, P.O. Box 605, Maputo, Moçambique	Name: Luis Aveleira Title: Head of Operations Email: luis.aveleira@cim.co.mz Web: n/a	Tel: +258 21 726 715 Mobile: +258 823 187 420 Fax: +258 21 720 091
Summary of Role and Services:		
Location: Maputo		
Capacity: 240 mt / day		
Storage: 17,000 mt		
Access: Road & rail sidings		
Comments: No fortification facility
