

2.2.3 Cook Islands All Other National Airports

Airports Overview

The airports listed below have no facilities other than a crushed coral strip and a single small building that acts as cargo and passenger terminal and ticket office.

There is no security screening and refuelling facility in the outer islands, no runway lighting or perimeter fencing, no fire fighting equipment available and other than Penrhyn - no navigation aid. Weather information (AWS) is obtained from Rarotonga Met service or Rarotonga Air Traffic Control, Windssocks are on each of the islands located either end of runway, ground handling to these islands is arranged through Air Rarotonga, main domestic carrier. Aircraft parking is limited. Apart from Manihiki, Penrhyn and Pukapuka the airports are located within a short distance of the main village on their respective Island. These airports are non-certified aerodromes, their respective Island Council's manage state of runway.
